Burgan Bank (Full Stack Developer)

Jan. 2019 - Present

- Working on Online Banking Application and state based Retail Loan Application.
- Full stack development activities using the following technologies; .NET CORE, Entity Framework CORE, Identity Server, Sql Server, Angular 8+
- Supporting new team members.
- Sprint planning and help team activities.
- Relationship management for third parties.

Innova Corp. (Full stack Developer)

Jan.2018 - Jan.2019

- Worked on an online banking project which brings multiple banks in the same portal.
- Developed real-time monitoring capabilities for online bank accounts and transactions by using domain driven design pattern. Based on Asp.Net MVC, WCF Rest Services, Kendo UI, Asp.Net API and Sql Server.
- Developed scheduled jobs to integrate with banks and manage company's accounts. Every bank has its cron and different set of parameters to communicate with them. This service was receiving company's banking data. Based on; Hangfire
- Contribute sprint planning as a Scrum Master.

KoçSistem Corp.(Back-end Developer)

Jun. 2016 - Jan 2018

- Developed Ford Turkey's car services web application which is used by nearly 1000 car services in Turkey. Contributed to modules such as ; car replacement , bill management and campaign management. Core campaign and bill functions were exposed REST services to the outside world. The whole business logic was in Stored Procedures and Functions. Upgraded application to higher version of .NET Framework.Used to Ado.NET to communicate with databases.
- The project was based on C# 4.5, Asp.NET, JQuery, PL/SQL.

Ford Turkey (Back-end Developer)

Jun.2015 - Jun.2016

- Developed Ford Turkey's employee Learning Management System which was controlling 1000+ documents in application. The application was managing employee's education on some specific work.(e.g painting of car, safety of work etc.) All employee of Ford had to use this application for legal obligation and had to report his/her supervisor.
- Based on Asp.NET, DevExpress UI, JQuery, PL/SQL
